Every minute counts... **Help us save our planet!**

For every minute you cut back while taking a shower you can save up to **10 gallons** of water.

Short showers can help save tons of gallons of water a day.

Using this clock will help you contribute to save our planet by helping you take a responsible timed shower.

How to use the **Eco Clock**:

- Place the clock on a clean flat surface
- Start the clock
- Try to beat the clock: Before the 5 minute cycle is over your shower must be completed.
- Make an effort by trying to beat the clock every day. This will help save water of gallons daily.

The tolerance of the clock may vary + / - 30 seconds.
